

**Part Number:**      **Water Sensor**

## Description

The water sensor allow the climate monitor to detect leaks that could damage your equipment. The sensor measures conductivity and indicates whether the sensor is dry, damp, or completely immersed in water.

- Used to detect water leaks
- Connects to the monitor via Analog Input or CCAT
- Receive alarms via e-mail or SNMP

When water or other conductive liquid is present, a tiny electrical current flows between the metal contacts on the sensor. The more liquid the higher the current. A cable attached to the sensor allows the climate monitor to detect the presence and severity of a leak. Some example sources include:

- Plumbing fixtures
- Air-Conditioner drip pans
- Condensation-outflow pipes
- Roof/ceiling leaks

## Features

Specifications:

- Conductivity-based sensor (0-5VDC)
- Cable length: 15' or 100'
- Cable type: 2-conductor wire
- Warranty 1 year (extended warranties available)

Compatibility:

- Works with all climate/power monitors with analog ports
- Compatible with CCAT Analog to Digital Interface
